## LW-126-13

The LW-126-13 provides the maximum performance from an ET-126 shaker without a cooling vacuum. It has excellent high frequency capabilities and is used for both modal and general purpose testing. Compact size and light weight make it a very portable desktop system. This is a popular choice for medium acceleration level testing.

## PA-138

The Labworks PA-138 Linear Power Amplifier is a high quality, air-cooled, direct-coupled audio amplifier primarily intended for use with small vibration systems. Although this amplifier has been designed to directly drive low impedance loads, it can be used in any application requiring continuous duty, high quality, audio power.

PA-138 Amplifiers feature protection from both over current and over temperature insuring long term reliability. The amplifier has full interlock capabilities as well as peak voltage and RMS current bar graphs to monitor output.
